

IMPECCABLY CLEAN ENCLOSURES, MINIMUM EFFORT

TREATMENT INCLUDED IN
BELUS, ALHAMBRA, STEEL, MOON AND VITA

TEKNO
CLEAN

Our fixation on innovation has resulted in TEKNOCLEAN, an intelligent nanotechnology-based system for applying a protective coating to the surface of glass which repels liquids and reduces the build-up of dirt and limescale to a minimum. This treatment means that customers get impeccable, quick and lasting cleaning results.

An EnduroShield study has certified the effectiveness and reliability of the TEKNOCLEAN system, having carried out a high number of rigorous resistance tests on it. Our system achieved excellent results, certifying that the application methods use ensure proper adhesion so that enclosures can be cleaned quickly and easily.

ADVANTAGES THAT SHINE OUT

- Coating that stands up to common cleaning products.*
- Quicker, more effective cleaning with less effort.
- Looks brand-new for longer.
- Makes cleaning easier, but does not mean that cleaning is not necessary.
- Gives the surface non-stick properties.
- Reduces build-up of dirt and limescale to a minimum.
- Protects from hard-to-shift oily or greasy marks.
